

Thermal Software System (TSS) v14.01 -

- + 12 software applications to allow you to perform spacecraft thermal design.
- + Uses CAD models directly in STEP AP 203, STEP AP 214 and IGES format.
- + Leverages existing CAD data without expensive 3rd party software to prepare model.
- + Easy to use 508 Compliant interface.
- + Direct interface with Structural Analysis Tool (SAT)
- + Software that synthesizes your design with input from the entire project group.
- + Simulates energy balance on free flying spacecraft, with the following equation.

$$(mc)_i \left(\frac{dT}{d\tau} \right)_i = \sum_{j=1}^N G_{i-j} (T_j - T_i) + \sigma \sum_{j=1}^{N+1} R_{i-j} (T_j^4 - T_i^4) + Q_i$$
